Reuters Events invites the data & technology insurance community to achieve unparalleled insurance success at Insurance AI and Innovative Tech USA 2022 in Chicago (April 26-27)

Insurance AI and Innovative Tech USA 2022, Chicago, April 26-27, 2022 – the window for carriers to redefine their insurance is narrow, and it's happening now. The industry is being inundated with the latest technology and overwhelmed with never ending data, leaving carriers struggling to future-proof their tech ecosystems and tap into the potential of data.

At this exclusive data & tech insurance conference, hosted by prestigious organizer Reuters Events, the community is coming together, in-person, to address their challenges head on, gain insight from peers and develop your future insurance vision as previously unimaginable.

Insurance AI and Innovative Tech USA 2022 is expected to attract 400+ attendees and feature 35+ senior executive speakers. Confirmed speakers include Bill Martin (President & CEO, **Plymouth Rock**), Monica Caldas (EVP, Chief Information Officer, Global Retail Markets, **Liberty Mutual**), Alex Frommeyer (CEO, **Beam Dental**), Matteo Carbon (Founder & Director, **IoT Insurance Observatory**) and Amy Shore (EVP, Chief Customer Officer, **Nationwide**).

We will be addressing agenda topics driven by industry challenges and solving the problems falling under our 4 core themes:

- **Future-Proof Technology:** Implement a flexible and agile ecosystem and sift through the thousands of solutions on offer to keep up with the pace of the technology market. Be a digital insurance leader
- **Untapped Data Potential:** Ensure data management is a priority and keep data privacy in consideration. Make sense of the infinite data streams and reap the benefits of data-driven decisions from analytics insights and AI's predictions
- **Culture Change Without A Culture Shock:** Achieve fundamental change and foster the mindset required to be truly data and tech driven. Nail the culture change and fly to the top of a hyper-competitive digital insurance market

- The Speed Of AI With A Human Touch: Accomplish the balance of human and AI – use data and technology to hit customer expectations on the head by understanding individuals and personalizing each interaction

Attendees will gain first-hand insights from thought-leaders at the forefront of insurance transformation as they lead presentations and panel discussions. They will benefit from in-person networking with experts in insurance data & technology, making the connections and developing the community we have missed over the pandemic.

Reuters Events: Insurance AI and Innovative Tech USA 2022 will take place on April 26 & 27 at the Sheraton Grand, Chicago. For more information visit: [Insurance AI and Innovative Tech USA 2022](#) or email lucy.hughes@thomsonreuters.com
