# How to Connect MetaMask to the Polygon Network

The MetaMask wallet is a user-friendly way to connect to the network.

One thing to note is that the Polygon network was formerly called the Matic network and matic is still the name of the network's native token.

# Steps to connect MetaMask to Polygon:

1. Open and log in to your MetaMask wallet

Log in (MetaMask)

2. From the account options, which is a circle icon, go to "Settings."

## Settings (MetaMask)

3. Once you are in settings, select "Networks."

**Network settings (MetaMask)** 

4. Press the "Add Network" button.

Ethereum Mainnet 🗸

G Goerli Test Network 🔒						
Add Network						

Add network (MetaMask)

5. You will be taken to a new screen. This is the most important step because this is where you will add the information to connect to the Polygon network.

Input the following new information and press save:

#### Network Name: Polygon

#### New RPC URL (Choose one of the following):

- https://polygon-rpc.com
- https://rpc-mainnet.matic.network
- https://rpc-mainnet.maticvigil.com
- https://rpc-mainnet.matic.quiknode.pro

#### ChainID: 137

#### Symbol: MATIC

### Block Explorer URL: https://polygonscan.com

		Cancel Save					

Network info (MetaMask)

6. Upon adding that information, you will be brought back to the wallet screen. There are two signs that the Polygon network was added to your MetaMask wallet. The two red boxes shown in the screenshot below confirm it. The first box above shows the MATIC token standard, and the bottom right shows "Polygon was successfully added."

🗮 METAMASK			• Polygon 👻 🥥
