WORK EXPERIENCE

Peach Insurance Services, LLC

Full Stack Web Developer

Mar. 2020 - Current

Ponte Vedra, FL

- Developed web applications tailored for insurance services.
- Implemented a comprehensive platform for client information management and multi-product applications that resulted to 25% increase in revenue
- Created public and internal insurance quoting systems, liaising with insurance carriers for API access and data integration.

JPTechworks, Inc

Founder, IT Consultant and Web Developer

June 2007 - Mar. 2020

Jupiter, FL

- Successfully led a web development and IT consultancy, initially offering a broad range of IT services for small businesses before specializing in web development in the last five years.
- Designed and implemented custom websites and web applications.
- Managed IT infrastructure, including network and server administration, for clients, with a focus on cost-efficiency and reliability.
- Designed, built, sold, and set up custom-configured computers and networks for business clients.

National Software Testing Laboratories

Quality Assurance Tester

July 2003 - Aug. 2005

Blue Bell, PA

- QA Tester for Microsoft PlaysForSure, Qualcomm True Brew and Microsoft Windows Mobile certification programs.

SKILLS, CERTIFICATIONS, INTEREST

Front-End Development: Proficient in creating responsive and interactive user interfaces, skilled in HTML5, CSS3, JavaScript (ES6+), TypeScript, and familiar with front-end frameworks like React.js, Angular, and Svelte. Continuously enhancing my toolkit with a broad array of contemporary front-end tools and practices to ensure efficient and modern UI development.

Back-End Development: Skilled in server-side application development using Node.js, with a strong focus on efficient API integration and serverless architecture.

IT & Network Systems Management: Proficient in overseeing IT infrastructure, including server administration across Windows and Unix/Linux systems and network configuration (routers, switches, VPNs). Experienced in designing scalable network architectures and implementing cloud solutions using AWS and Azure.

Database Management: Familiar with SQL and NoSQL databases, emphasizing PostgreSQL in recent projects.

Certifications: CompTIA A+ Certified

Interests: 3D printing, Smart home, Basketball, Skiing
