# IT Services

eNoah has been providing robust insurance support and information technology services to carriers and distributors for over 15 years.

We can augment carrier teams with offshore FTE resources ($30-$40/hour) or qualified, competent stateside IT engineers. Our blended delivery model, with stateside IT managers project managing an offshore delivery team, has also been a great success. Our IT team workers can offer 24/7 support to help you meet critical project timelines, cover off-peak hours, and handle support tickets and other maintenance activities.

eNoah is a Microsoft GOLD Partner. We provide application development and maintenance services using a global delivery model.

Our Technology Services include

- Monitor and manage multiple servers.
- Manage data movement across DB and data warehouses.

- Integrations and interface development using on-premise and cloud tools in Azure and AWS. We enable APS Retrieval and Summarization by developing and maintaining integrations between carriers and our platforms.
- Extract, Transform, and Load data using MS-SSIS, Informatica, and other tools.
- Visualization of analytics dashboards using tools like Power BI, Tableu, and Qlicksense.

Technology stack includes Microsoft and Open Source platforms such as Java and PHP.

iOS and Android native development and cross-platform development on Ionic and Xamarin.

Enable digital transformation using platforms like Microsoft SharePoint and PHP, or build and maintain applications and workflows using SalesForce.

Leverage Machine Learning and Artificial Intelligence.
