

Health Gorilla Integrated Telehealth Data Solutions

Unlock Comprehensive Medical Histories

Health Gorilla has combined industry-leading health data interoperability services with our full-service telehealth network to empower insurance carriers.

Enhance the underwriting process with:

Industry winning data access. Retrieve actionable medical records collected from over 90% of healthcare organizations.

Proprietary data enrichment. Leverage actionable data normalized through an industry-leading data processing engine.

Health data expertise. Partner with a team that has years of experience exchanging millions of clinical documents a day.

No more incomplete records

Receive complete medical records for 90% of your applicants where medical records are a requirement.

Improve service

Innovative insurers translate easier and faster underwriting into an improved applicant experience.

Get a comprehensive view of an applicant's health

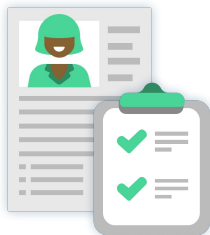

Receive valuable clinician notes from your applicant's telehealth evaluation.

Streamline underwriting

The average time it takes to collect medical records is 40 days. With Health Gorilla, it can be as fast as four minutes.

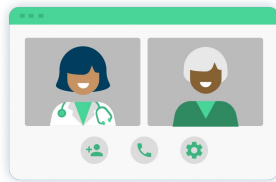

How it Works:

1

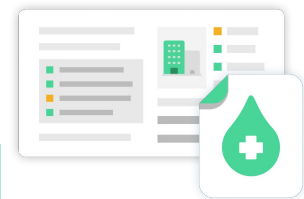

A carrier orders an applicant's health records.

2

An applicant schedules & participates in a telehealth evaluation.

3

The carrier receives an actionable view of the applicant's comprehensive medical history.

Who is Health Gorilla

Fragmented clinical data is often challenging to understand, is limited in utility, and can lead to inaccurate decisions. With Health Gorilla's data retrieval and enrichment services, insurers leverage an actionable and structured view of each applicant's historical medical data.
