

# AI-Powered Insurance. Reimagined.

InsurancGPT is your domain-trained GenAI platform built to augment underwriting, streamline claims, and unlock decision intelligence across the insurance value chain.

## Why InsurancGPT?

- ✓ Built exclusively for P&C insurance
- ✓ Trained on millions of industry documents
- ✓ Designed to meet compliance and regulatory needs
- ✓ Integrated with your existing core systems
- ✓ Delivers real-time insights and guidance

## Key Capabilities

### InsureAssist

Your AI co-pilot. Navigate tasks, explain policies, and deliver insights instantly.

### UnderwriteIQ

AI-augmented risk assessment and policy generation with speed and accuracy.

### ClaimFlow

Automates FNOL, fraud checks, and settlement tracking. End-to-end claims flow.

### InsightEdge

Predictive dashboards, portfolio health, and risk modeling in real time.

### PoliChat

24/7 multilingual chatbot for policyholder queries and claim guidance.

### DocuSure

Reads, classifies, and extracts data from insurance documents, reducing manual effort by 80%.

## Trusted by Brokers, MGAs, and Carriers

“With InsurancGPT, we cut underwriting time by 40% and improved quote accuracy dramatically.”

– VP Underwriting, Mid-Sized P&C Carrier

Built with Enterprise-Grade Security | GDPR-Ready | Scalable Across Regions

## Real-World Use Cases

01

### Cognitive Underwriting

Automate intake, risk classification, and quote generation.

02

### Claims Triage

Identify high-risk claims with predictive scoring and AI-based document checks.

03

### Portfolio Profitability Analysis

Segment portfolios dynamically to prioritize action on low-margin blocks.

04

### Compliance Monitoring

Ensure regulatory alignment across jurisdictions with AI-flagged red zones.

## Built on GenAI Foundry

Powered by Enkefalos' proprietary GenAI Foundry, InsuranceGPT combines LLMs, retrieval-augmented generation (RAG), and domain-trained agents for:

### Data Security

Self-hosted or private cloud deployments

### Continuous Learning

Adapts to your workflows and data

### Seamless Integration

Compatible with Guidewire, Duck Creek, Salesforce, and more
