

SOLVRAYS

Where AI Genes Meet Enterprise Intelligence

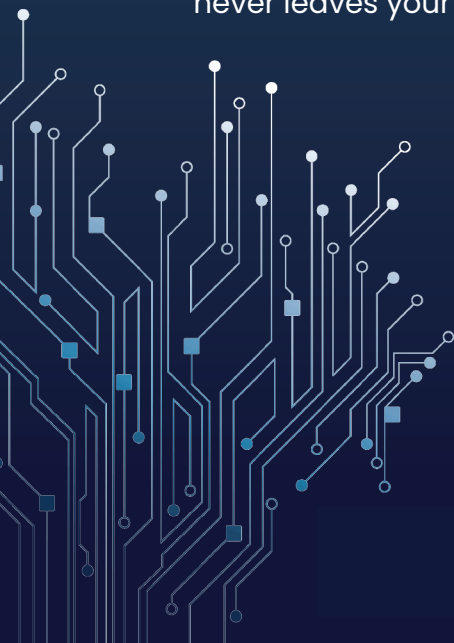

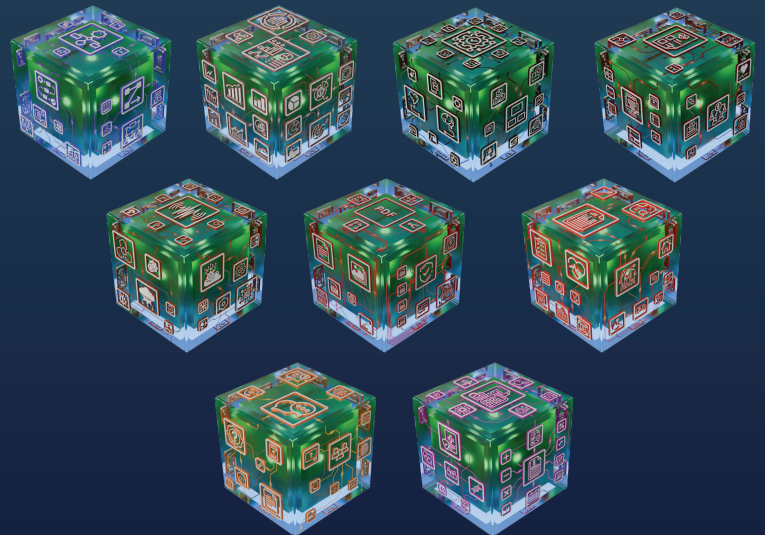

Your existing systems work hard—now make them unstoppable. Deploy our 9 specialized AI genes that unlock their full potential and elevate your platforms. Intelligence that thinks, learns, and evolves—connecting what you have with what you need.

Transformative AI That Adopts and Compliments Your Existing Eco-systems

Stop ripping and replacing. Start evolving and enhancing. Solvrays AI genes integrate with your core systems, databases, and upstream platforms making everything work better together.

The Future of Enterprise Automation is Already Here

While your competitors struggle with yesterday's technology, you'll be orchestrating tomorrow's operations. Deploy on-premise or cloud, your data never leaves your control.

Meet the AI Genes

Your business operations are about to get an evolutionary upgrade. Each AI gene is engineered for specific back-office challenges—from document intelligence to workflow orchestration.

1 PulseGene

The Orchestration Engine

The crown jewel of our AI ecosystem. PulseGene doesn't just process data, it understands context, learns from every interaction, and orchestrates intelligent workflows across your entire system landscape.

- **Intuitive drag-and-drop** workflow builder
- **Visual workflow testing** and debugging
- **Real-time** execution with live updates
- **Seamless** integration with all AI genes

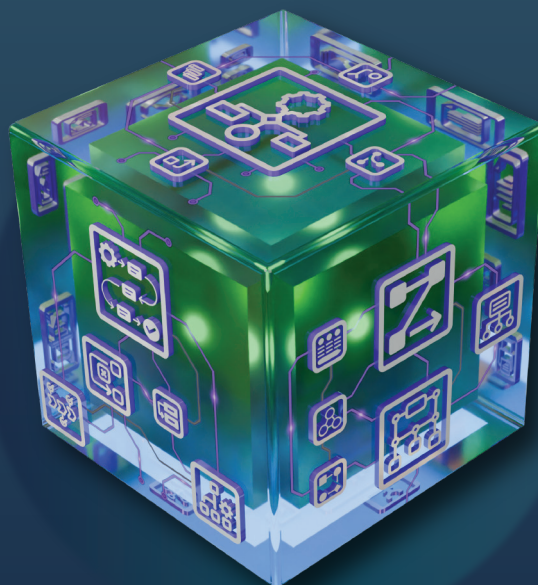

2 RouteGene

Intelligent Task Orchestration

Catch what falls through the cracks. RouteGene complements your specialized case management systems by handling the ad-hoc tasks, quick assignments, and triaging that don't fit into formal workflows—visual boards that work alongside your enterprise tools.

- **Visual kanban** boards & task cards
- **Quick task** capture & assignments
- **Team collaboration** outside formal systems
- **Complements** existing case management tools

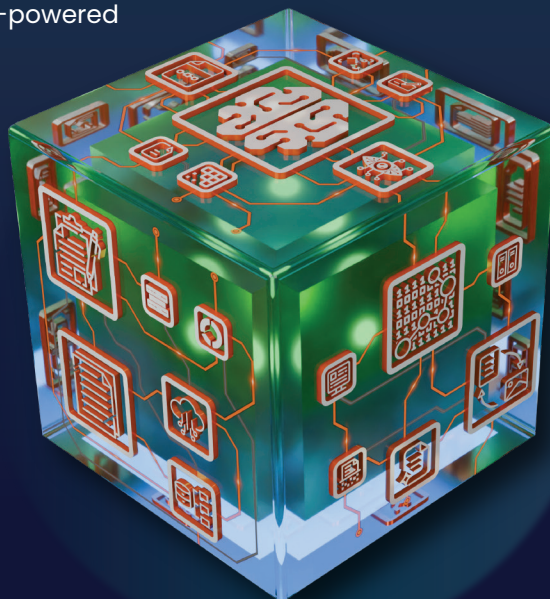

3 ScribeGene

AI-Powered Document Intelligence

Your intelligent document processing hub. ScribeGene handles everything from emails and attachments to handwritten, scanned documents and media files—automatically classifying, extracting, and routing content to the right systems with AI-powered intelligence.

- **AI document** type classification
- **Multi-format** content processing
- **Intelligent** PDF splitting & extraction
- **GEnterprise** AI & ML platform integration

4 ClouGene

Intelligent Cloud Storage & Orchestration

Your enterprise-grade cloud storage platform that thinks ahead. ClouGene securely manages your files, automatically organizes incoming documents, schedules critical tasks, and orchestrates your digital inbox ensuring nothing falls through the cracks while maintaining complete security and compliance.

- **Secure** cloud file storage & sharing
- **Smart** inbox orchestration
- **Automated** document organization
- **Intelligent** task scheduling

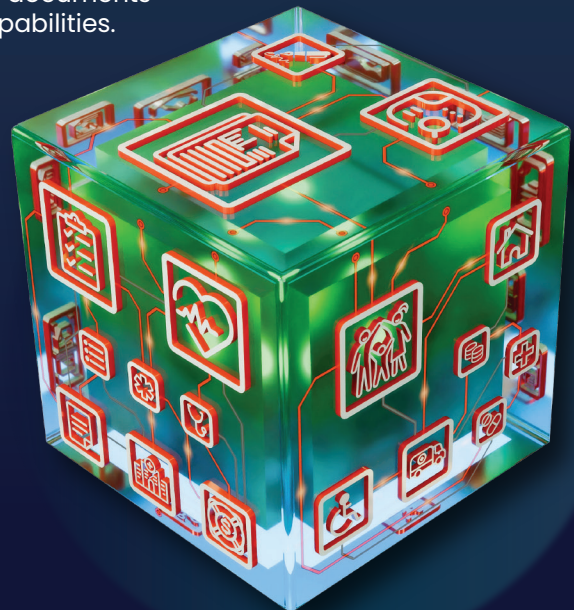

5 DocuGene

Document Intelligence Engine

Transform your document workflows with intelligent template management and generation. DocuGene creates, manages, and generates customized documents with API-first design and real-time preview capabilities.

- **Dynamic** document generation
- **API-first** architecture
- **Template** management system
- **Real-time** document preview

6 CalcGene

Excel-to-API Transformation Engine

End the chaos of multiple Excel versions floating around your organization. CalcGene transforms your critical spreadsheets into secure, governed APIs that prevent unauthorized changes while maintaining all your complex formulas and business logic.

- **Excel-to-API** transformation
- **Unauthorized** change prevention
- **Version** control & governance
- **Complex** formula preservation

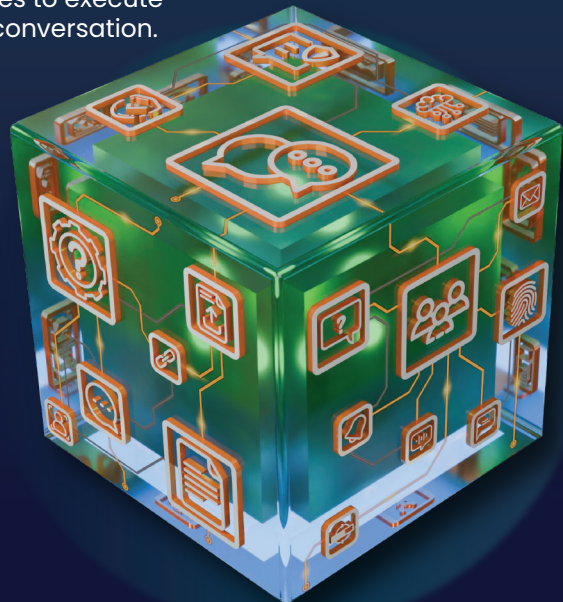

7 convoGene

RAG-Powered Conversation Intelligence

Your intelligent conversation partner that knows everything about your organization. ConvoGene uses RAG technology to provide contextual responses, can orchestrate PulseGene workflows, and connects to all AI genes to execute complex multi-step processes through natural conversation.

- **RAG-powered** contextual responses
- **Cross-gene** workflow execution
- **PulseGene** orchestration via chat
- **Natural** language task management

8 BrowGene

Web Intelligence Automation

Turn every web application into an extension of your team. BrowGene navigates complex online interfaces, automates repetitive web tasks, and integrates disparate web-based systems with human-like intelligence and precision.

- **Intelligent** web process automation
- **Adaptive** interface navigation
- **Cross-platform** integration
- **Real-time** web task orchestration

9 DeskGene

Visual Desktop Intelligence

Bring AI intelligence to any desktop application or legacy system. DeskGene sees what humans see, understands visual interfaces, and executes complex desktop workflows with the precision of your best employees—but never gets tired.

- **Visual interface** automation
- **Intelligent** screen interaction
- **Legacy** system integration
- **Desktop** workflow optimization
