It emphasizes:</p> <ul style="list-style-type: none"> <li>Modernizing the Tech Stack: Transitioning workflows to R and Python to improve accuracy and speed.</li> <li>Practical Application: Moving beyond hypothetical theories to provide "actionable artifacts"—such as code templates and frameworks—that attendees can use immediately.</li> <li>Reproducibility &amp; Governance: Using tools like Posit Connect and Package Manager to ensure models are traceable, auditable, and meet strict regulatory standards.</li> </ul> <p><b>Key Highlights (2025 Event)</b></p> <ul style="list-style-type: none"> <li>AI &amp; Automation: A major theme was the integration of AI-driven tooling into the actuarial lifecycle. This included live demos of Positron (Posit's new IDE), the Positron Assistant for refactoring legacy code, and Databot (AI) for analyzing and documenting datasets.</li> <li>Cloud Migration: Sessions addressed the challenges of migrating actuarial workloads to the cloud, an area where the life insurance industry has traditionally lagged.</li> <li>Industry Tracks: Specific content for Life, Health, and General Insurance, covering topics like pricing, fraud detection, and loss reserving.</li> </ul> <p><b>Professional Benefits</b></p> <ul style="list-style-type: none"> <li>Continuing Education (CE) Credits: The 2025 summit offered over 20 CE credits, making it a vital event for maintaining professional compliance with bodies like the SOA and CAS.</li> <li>Networking: Despite being virtual, the event included "Birds of a Feather" networking and community interactions to connect peers across different insurance carriers.</li> <li>Scholarship Support: Net proceeds from the event often support scholarship programs for groups like the International Association of Black Actuaries (IABA) and the Organization of Latino Actuaries (OLA).</li> </ul> <p><b>Who Attends?</b></p> <ul style="list-style-type: none"> <li>Actuaries &amp; Analysts: Those looking to automate repetitive tasks and build more robust models.</li> <li>Technical Leaders (CTOs/Chief Actuaries): Executives evaluating how to break down data silos and implement better risk management frameworks.</li> <li>Data Scientists in Insurance: Professionals specializing in predictive analytics, GLMs, and machine learning for pricing and claims.</li> </ul> <p>The <b>NAIC Fall National Meeting</b> is one of the National Association of Insurance Commissioners' flagship annual gatherings, serving as a critical forum for finalizing regulatory priorities, reviewing year-end developments, and setting the stage for the upcoming legislative and regulatory cycle. The meeting brings together state insurance regulators, legislators, industry executives, compliance leaders, and consumer advocates to participate in open hearings, task force updates, and committee sessions that influence the direction of U.S. insurance regulation across life, health, annuities, and property lines.</p> <p>The Fall Meeting often includes key decisions and updates related to model laws, solvency monitoring, market conduct oversight, long-term care reform, data and reporting standards, consumer protection initiatives, and emerging risk assessments. It provides carriers and industry stakeholders with direct visibility into upcoming compliance expectations, supervisory frameworks, and regulatory modernization efforts.</p> <p>Attendees typically include:</p> <ul style="list-style-type: none"> <li>State Insurance Commissioners and senior regulatory staff</li> <li>Compliance, legal, and government affairs leaders tracking policy developments</li> <li>Actuarial, solvency, and financial reporting specialists</li> <li>Product and operations executives across life, health, and annuities</li> <li>Consumer advocates participating in regulatory discussions</li> <li>Innovation and insurtech leaders collaborating with regulators on digital transformation</li> <li>Industry associations and policymakers contributing to national regulatory strategy</li> </ul>	<p>coming soon</p>
